Our Expertise

We specialize in building custom enterprise software. We combine cross-domain knowledge and deep tech expertise to help companies scale up their businesses, reduce overhead costs, and comply with market regulations.

WEB DEVELOPMENT

Develop feature-rich web solutions using the most up-to-date technologies, tools and user-friendly interfaces.

MOBILE DEVELOPMENT

Modernize your existing app by migrating it to a newer tech stack or build a brand-new mobile solution supporting multiple devices.

BIG DATA

Get insights from terabytes of data and effectively leverage them to predict user behaviour and personalize your service offerings.

UI/UX DESIGN

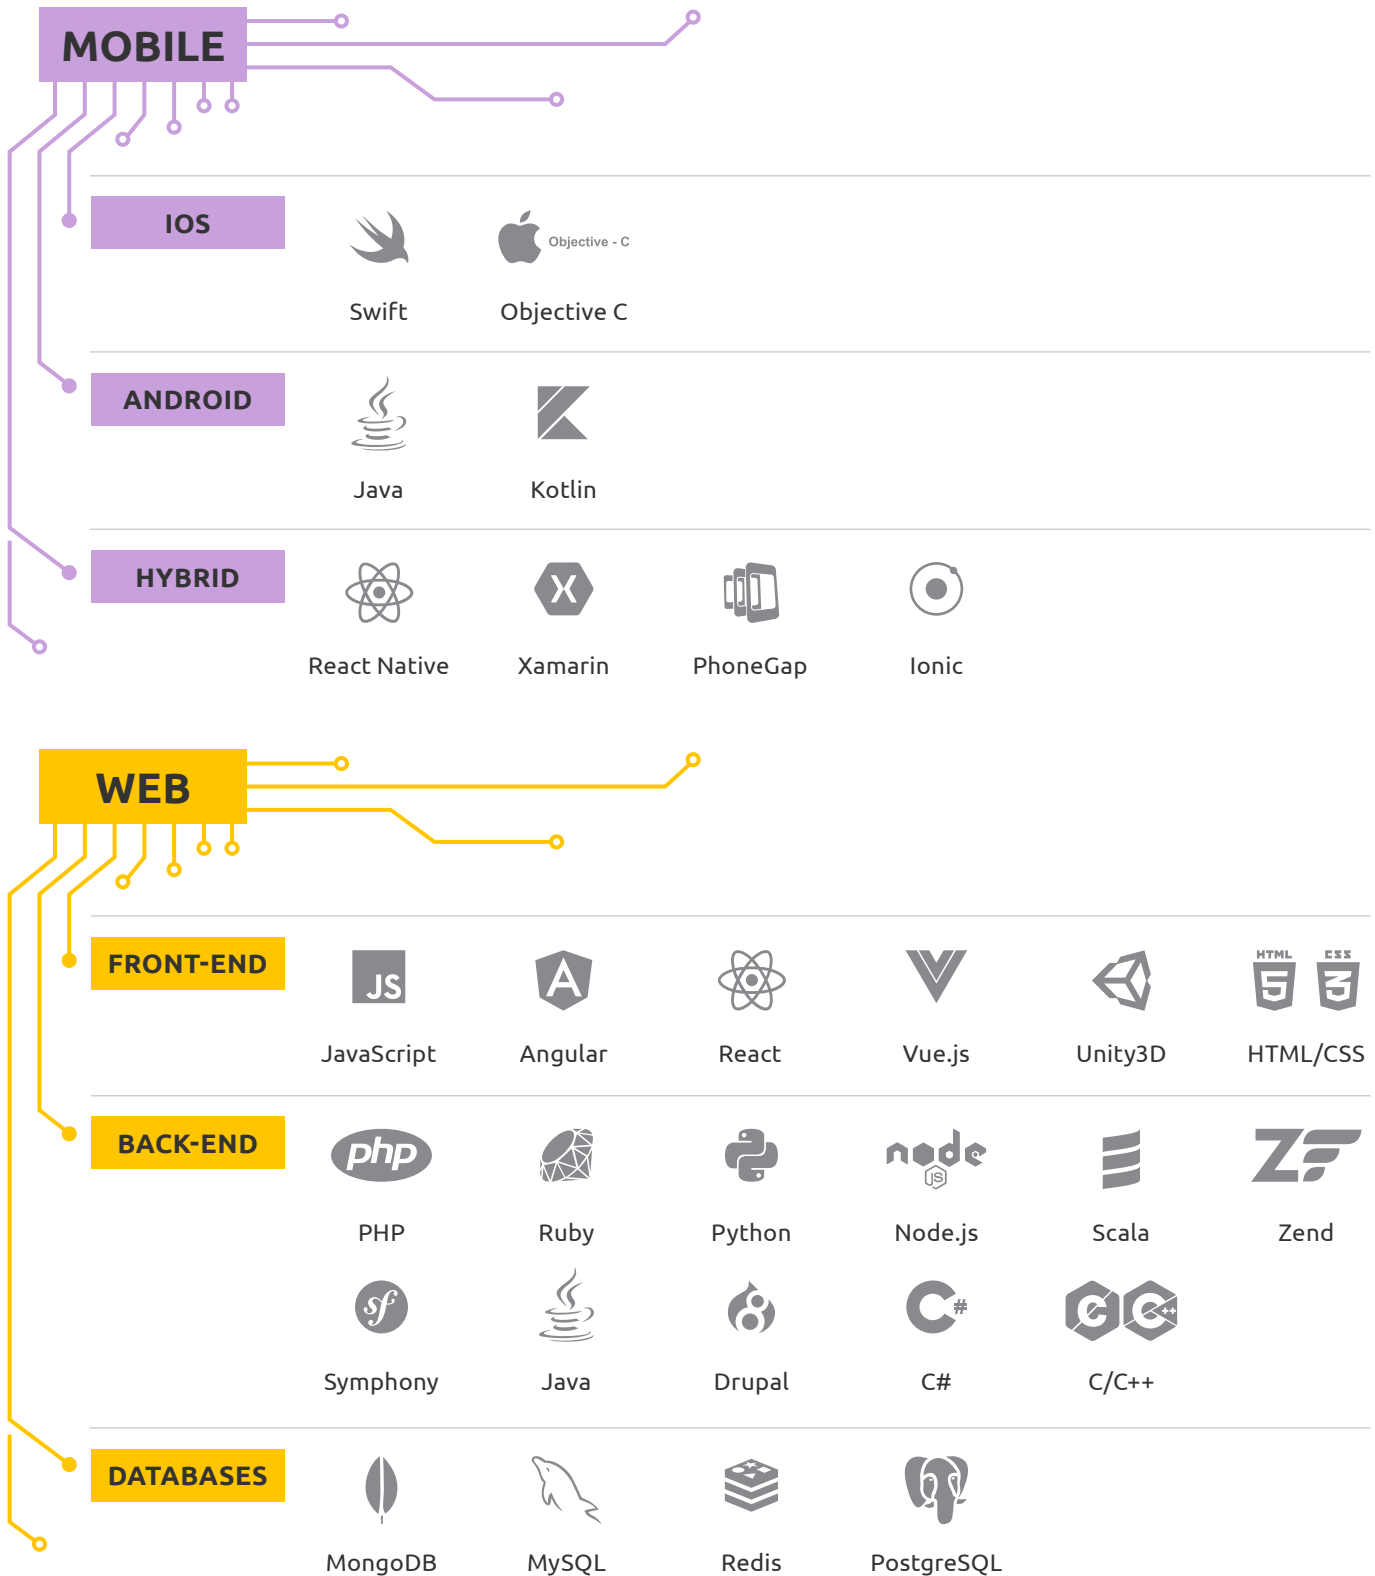

Create engaging, intuitive solutions and increase user conversion rates with the help of best-in-class UI/UX specialists.

BUSINESS ANALYSIS

Identify effective solutions to your business problems and deliver more value to your customers and key stakeholders.

Our Stack of Technologies

Daxx provides engineering talent in most web, mobile or desktop technologies. Just tell us the details of your project, your desired skill set and team setup, and we will get back to you shortly with a list of suitable candidates.

Our Clients

We serve small, medium and enterprise-level companies coming from **17 countries** and a wide range of industries, including (but not limited to):

Healthcare

eCommerce

Hospitality

Fintech

WAYS

Since 2012, when we first partnered with Daxx, our monthly recurring revenue has more than doubled, and so did the number of subscribers to our service. When we started, our annual growth was 5 percent, but now we're looking at a 30 percent growth year on year."

JURGEN DELFOS

CTO at Carerix

The experience with Daxx is very positive and they deliver the Java development resources we are looking for. Daxx takes care of the team members' social contributions, pension fund payments, taxes, vacations, sick leaves and the like which means I don't have to worry about this and can fully concentrate on the actual development work."

ONNO BECKER HOF

CTO at Euretos

Our team in Ukraine is very loyal and dedicated, Ukrainian developers really strive to understand our business, and add value to it. This, together with the support of Daxx's team, enables us to concentrate on what is important to us and our business."

ALEX OLEJNIKOV

Director of Software Engineering at CompuWeigh

Working with Daxx has helped us to respond to market needs faster and more efficiently with top quality developers who are as dedicated to success as our own internal people. We see the developers at Daxx as an extension to our team. It's a win-win situation for everyone."

STAFFORD SUMNER

Founder & CEO at Jarrang
